In the volcanic Eifel: A holiday ramble

by Katharine S Macquoid

The volcanic Eifel or Vulkan Eifel (German: Vulkaneifel) is a region in the Eifel Mountains in Germany, that is defined to a large extent by its volcanic geological. The Eifel region has been shaped by volcanic activity during the Lower Devonian period. In the Eifel region, the volcanic activity continued in the Upper Devonian and Lower Carboniferous periods. The volcanic eruptions created a landscape of lava flows, lava domes, and volcanic cones. The Eifel region is known for its unique geology and landscape, which is protected by the Eifel Geopark, a UNESCO World Heritage Site. The Eifel region is also known for its unique species, snorkel with sea lions, hike a volcano—life as you know it seems very far away.
